Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

EXAMINER'S RESPONSE

Status of Application

This application is a Continuation of Application Serial Number 08/883557.
Currently pending are claims 13-49.

ART REJECTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 13-15,20,28-30,43-45,48,49 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Busch (5408513).

Busch shows a financial transaction device 110 connected to a wireless adaptor 112 to convert data to a different format. Busch also shows a first wireless modem 124 that sends data over a wireless media (antenna on element 124). The data is received at a "host" which includes another (or second modem) and first communication means to communicate to a computer and authorization processor. The adaptor includes an audio frequency modem 126 as claimed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2635

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 16-27,31-42,46,47 are rejected under 35 U.S.C. ' 103 as being unpatentable over Busch as applied to claims 13,28,43 above, and further in view of common knowledge in the art. The examiner takes official notice that the devices claimed (claims 16,17,31,32,46,47) are well known devices equivalent to the devices taught by Rogge. The examiner takes official notice that the networks claimed (claims 19-27,34-42) are well known networks equivalent to the networks taught by Rogge. Furthermore, the extent of disclosure the applicant provides is evidence of the fact that the applicant believes that the types of network (or types of device) are known to the artisan. The applicant has not invented these specific networks (or devices). Regarding claims 18,33, the references, discussed above, discloses the claimed invention except for having the claimed elements in a single computer system. It would have been obvious to one having ordinary skill in the art at the time the invention was made to place all these elements in a single computer, since it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art. Howard v. Detroit Stove Works, 150 U.S. 164 (1893). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have utilized any of the claimed networks (or devices) in the

Art Unit: 2635

above modified system since that would have been equivalents to the elements used in the above modified system.

This is a Continuation of applicant's earlier Application No. 08883557. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian A Zimmerman whose telephone number is 703-305-4796. The examiner can normally be reached on Off every other Friday.
